

Waterfall Trail

Follow the valley up into the mountains to find a magical place in the middle of the forest. Swim in the natural pool and walk back along the river to witness all kinds of birds drinking the water.

1. This trail starts at the Lora Cabin. If you start from the roundabout just follow the signs to the Lora cabin.
2. Continue the trail left of the cabin and follow the yellow signs.
3. Once you reach a T-junction, turn left. Continue until you reach a fence. You can cross it climbing up the rocks.
4. Keep walking straight, below the rock wall, cross another fence, and keep left.
5. Follow the path through the banana fields until you reach the next fence. Just go through it and follow the path straight.
6. You will see some old coffee fields on the left and a few minutes later a huge tree on your righthand side. Go a little bit more uphill until you reach the fence of this field.
7. Once you have reached the fence, walk to the left where there will be an opening and you can cross the fence easily. Continue forward on the path up the grass field, crossing a huge boulder on your left. Walk towards a fence again, cross it at an easy location.
8. Go into the field with HIGH grass. This path goes slightly uphill, walk towards the beginning of the tree line, and walk until the **yellow arrow** that shows to the left. Go down here and cross a creak.
9. Go through the bushes, you can hear the waterfall getting louder. Yeay, you made it to the waterfall!

Getting back:

- the **same way** you came or **following the river** downwards for around 45 minutes until you see a rock with a yellow arrow pointing to the left. Leave the river here. After following the path, you will reach a cross road, go to the right. Follow the path pass by the Beneficio and come back to where you started.
